Introduction to ArcGIS I - 9.2

933 Mobile Dr. | [Click here for map](#) [1]

ArcGIS Desktop is ESRI's full-featured GIS software for visualizing, creating, managing, and analyzing geographic data. This course provides the foundation for becoming a successful ArcGIS Desktop user. Students learn fundamental GIS concepts and become familiar with the range of functionality available in the software. In course exercises, they work with ArcGIS Desktop and see how it provides a complete GIS software solution.

Who Should Attend

This course is designed for those who are new to ArcGIS and to GIS in general.

Goals

Those completing this course will be able to

- Describe the structure of ArcGIS Desktop software.
- Display geographic data.
- Query a GIS database.
- Edit geographic data.
- Associate tables using joins and relates.
- Create maps, reports, and graphs.

Prerequisites

Students should know how to use Windows®-based software.

Costs

Training is available at the City of Longview or at your offices. Holding training in your offices saves your company resources. The fees for Introduction to ArcGIS I® are $425 per day per student or $7600 for a class of twelve students. These fees are substantially less than they are regulary priced.
